BACKGROUND

Michael Schrantz is the Founder and operator of Environmental Analytics LLC (EA). EA is a comprehensive Indoor Environmental Quality consulting company that covers a wide range of indoor environmental assessments for the residential, commercial, industrial, and medical sectors. Michael has over 23 years of active Indoor Air Quality & Building Science experience. To date, Michael has been involved in over 4500 related projects expanding across the country and world. His work includes the identification of a wide-range of contaminants in a structure, authoring of remediation and prevention protocols, and countless hours in consulting efforts for a wide-range of consumers.

INDUSTRY-RELATED MENTOR

Gary L. Gibson

Gary Gibson is well known and knowledgeable in the field of HVAC and IAQ. In 1988, Gary Gibson created the Versatile Trademark. This system encompasses multiple air distribution fundamentals, inclusive in the component devices, which provide proper air exchange for single-family home dwellings (designed under a U.S. patent (Gary Gibson the inventor & author)).
